## About PrimeVOLT

Asian Power Devices (APD) was founded in Taiwan in 1994, mainly focusing on power-electronics and renewable energy technologies. It has earned an important position in the global market thanks to its world-class technologies, competitive products and outstanding service.

PrimeVOLT, established in 2010, has become one of the leading manufacturers of PV inverters in Taiwan and merged into APD Group as its renewable energy business division in August, 2014.

PrimeVOLT is specialized in the design and manufacturing of PV inverters by benefiting from its strong R&D capabilities. By cultivating Taiwan's market for many years, PrimeVOLT has become a global inverter manufacturer who provides the most reliable high quality products with excellent performance, as well as professional services through localized support.

With design and manufacturing experiences accumulated over the years, PrimeVOLT inverters, which feature "extraordinarily stable and ultimately perfect performance", were awarded the "Taiwan Excellent PV Award" of Ministry of Economic Affairs, ROC in 2021 and 2022.

It is worth mentioning that PrimeVOLT has ranked top 1 shipment for inverters in 2022. With the goal of developing more markets for branding, PrimeVOLT debuts in Australia in 2023 with local team, company and HQ in Sydney, aiming at creating a sustainable green future by offering more competitive inverter solutions and reliable services to the market for a long-term run.

# OUR COMPETITIVE ADVANTAGES

**APD Group - The leader in power electronics and renewable energy technologies**

With around thirty years of cultivating its business in the power industry, APD Group has emerged as a technological leader in specific fields of applications thanks to its capabilities in high-quality and flexible production and designs.

Committed to continuous innovation and sustainable operations, APD Group further cements its position as a global leader in power electronics and renewable energy markets. We strive to provide people with high-efficiency, energy-saving technologies, empowering them to build a greener future.

## Robust R&D Expertise

- 3 R&D centers in both Taipei and Shenzhen
- 300+ R&D engineers with proven capabilities in research and development
- Senior engineers account for 30% of all R&D engineers
- In-house testing center approved by SGS, ITS, BV, and TÜV Rheinland

## Comprehensive Quality Management

- Comprehensive QC and GP systems throughout product development and production processes
- Endorsed by leading industry players

## Advanced Manufacturing Capabilities

- 16 high automation production lines
- 3 manufacturing bases in Taipei and Shenzhen
- Complete industry process ranging from PCBA manufacturing to burn-in tests
